Tips on How to Spot and Avoid Internet Dangers

Never lie about your age!

If you post your personal information online it can travel through the world in a matter of seconds.

Always use the privacy settings if you don't want anybody but your friends/family to see it. If you put your personal information online and you don't want anybody to change it, put it in private mode.

Don't post your school logo, age, home, family, name and pictures of your self in school and don't post your friends without their permissions . Don't meet up with anybody who you only know from online .
